Corbin Handbook of Bullet Swaging No. 9

Bullet swaging is a simple process where a piece of metal is held in a die and pressure is applied to the metal by means of one or two punches until the metal deforms to fit the die. No heat is used, only pressure. The amount of pressure needed to swage the part can vary from a couple of tons to many tons.

The Bullet Swaging Handbook - MAFIADOC.COM

tubing jackets. Bullet makers prefer to use drawn jackets for swaging precision projectiles. Swaging bullets using the cold flow method with manual hand tools, presses and dies is often credited to Ted Smith, author of the 45-page book The Bullet Swage Manual.
