In this fascinating new history, Judith Stein argues that in order to understand our current economic crisis we need to look back to the 1970s and the end of the age of the factory--the era of postwar liberalism, created by the New Deal, whose practices, high wages, and regulated capital produced both robust economic growth and greater income equality. When high oil prices and economic competition from Japan and Germany battered the American economy, new policies--both international and domestic--became necessary. But war was waged against inflation, rather than against unemployment, and the government promoted a balanced budget instead of growth. This, says Stein, marked the beginning of the age of finance and subsequent deregulation, free trade, low taxation, and weak unions that has fostered inequality and now the worst recession in eighty years. Drawing on extensive archival research and covering the economic, intellectual, political, and labor history of the decade, Stein provides a wealth of information on the 1970s. She also shows that to restore prosperity today, America needs a new model: more factories and fewer financial houses. --Publisher's description.

The New York Times bestseller: "You gotta read this. It is the most exciting book about Pluto you will ever read in your life." [Jon Stewart When the Rose Center for Earth and Space at the American Museum of Natural History reclassified Pluto as an icy comet, the New York Times proclaimed on page one, "Pluto Not a Planet? Only in New York." Immediately, the public, professionals, and press were choosing sides over Pluto's planethood. Pluto is entrenched in our cultural and emotional view of the cosmos, and Neil deGrasse Tyson, award-winning author and director of the Rose Center, is on a quest to discover why. He stood at the heart of the controversy over Pluto's demotion, and consequently Plutophiles have freely shared their opinions with him, including endless hate mail from third-graders. With his inimitable wit, Tyson delivers a minihistory of planets, describes the oversized characters of the people who study them, and recounts how America's favorite planet was ousted from the cosmic hub.

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

How can you say, "The Constitution failed?" Don't you mean, "We failed the Constitution?" Or is that a distinction without a difference? Since the declared and understood purpose to the writing and ratification of the Constitution was to create and sustain a limited government and since We the People now face an unlimited government Dr. Owens maintains we face the painful reality, "The Constitution failed." As a member of the Richmond Tea Party and a contributing author to the websites of numerous Tea Parties across the fruited plane Dr. Robert Owens, the author of the History of the Future builds upon Dispatches from that History to show not only that the Constitution has failed but that in many ways that failure was foretold before it was ever ratified by the arguments of the Anti-Federalists. He then goes on to offer recommendations for how We the People can organize and advocate for a solution which will preserve liberty in the land of the free and the home of the brave."

This New York Times Notable Book from the two-time Pulitzer Prize-winning author of The Underground Railroad and The Nickel Boys is a brisk, comic tour de force about identity, history, and the adhesive bandage industry. The town of Winthrop has decided it needs a new name. The resident software millionaire wants to call it New Prospera; the mayor wants to return to the original choice of the founding black settlers; and the town's aristocracy sees no reason to change the name at all. What they need, they realize, is a nomenclature consultant. And, it turns out, the consultant needs them. But in a culture overwhelmed by marketing, the name is everything and our hero's efforts may result in not just a new name for the town but a new and subtler truth about it as well. Look for Colson Whitehead's new novel, Harlem Shuffle, coming this September!

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.
