If you're replacing an old printer, recycle or donate it so it can become someone else's refurbished bargain. If money's tight, start with our picks for the best cheap printers , and check out how ...

"S. D. Chrostowska achieves unexpected buoyancy in spite of the intensity of her material. Permission, certain to be among the most formally adventurous books published this year, will thrill readers of fearless stylists like Blanchot, Barthes, and Anne Carson. In its obsessive intricacy, it evokes even earlier forbears: those wonderfully melancholy European humanists, Thomas Browne and Robert Burton.'Every Library is a haunted cemetery,' writes F. Wren, the narrator of Permission. This fine and perplexing novel is itself something between a library and a cemetery, spinning around the hauntings of desire, the confusions of memory, the ambiguities of solitude and, above all, the mystery of writing." — Teju Cole An unnamed, unemployed, dream-prone narrator finds himself following Chevauchet, diplomat of Onirica, a foreign republic of dreams, to resist a prohibition on sleep in near-future America. On a mission to combat the state-sponsored drugging of citizens with uppers for greater productivity, they traverse an eerie landscape in an everlasting autumn, able to see inside other people's nightmares and dreams. As Comprehensive Illusions – a social media-like entity that hijacks creativity – overtakes the masses, Chevauchet, the old radical, weakens and disappears, leaving our narrator to take up Chevauchet's dictum that "daydreaming is directly subversive" and forge ahead on his own. In slippery, exhilarating and erudite prose, The Eyelid revels in the camaraderie of free thinking that can only happen on the lam, aiming to rescue a species that can no longer dream.

The Congressional Record is the official record of the proceedings and debates of the United States Congress. It is published daily when Congress is in session. The Congressional Record began publication in 1873. Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States (1789-1824), the Register of Debates in Congress (1824-1837), and the Congressional Globe (1833-1873)

This authoritative guide helps Baby Boomers navigate their way through a host of issues that typically affect careers from the midpoint onward toward retirement. \* Comprises ten chapters in three sections: one on changes in the workplace during the Baby Boom years; one on specific challenges Baby Boomers face in their careers; and one on achieving goals, including starting a business and planning for retirement \* Presents charts and graphs explaining relevant statistical data \* Offers a bibliography of helpful additional sources in print and online

The Technical Advisory Group (TAG) for Water Use Assessment, composed by 30 international experts, has developed guidelines on water footprinting for livestock supply chains. The mandate of the Water TAG was to provide recommendations to monitor the environmental performance of feed and livestock supply chains over time so that progress towards improvement targets can be measured; apply the guidelines for feed and water demand of small ruminants, poultry, large ruminants and pig supply chains; build on and go beyond the existing FAO LEAP guidelines; and pursue alignment with relevant International Organization for Standardization (ISO) standards, specifically ISO 14040, ISO 14044 (ISO, 2006b and 2006a) and ISO 14046 (ISO, 2014). The guidelines on water use assessment include the impact assessment: the assessment of the environmental performance related to water use of a livestock-related system by assessing potential environmental impacts of blue water consumption following the water scarcity footprint according to the framework provided by ISO 14046 (ISO, 2014); and the assessment of the system's productivity of green and blue water. The guidelines are thus intended to support the optimization of use of water resources and the identification of opportunities to decrease the potential impacts of water use in livestock production. The Water TAG guidance is relevant for livestock production systems, including feed production from croplands and grasslands, and production and processing of livestock products (cradle-to-gate). It addresses all livestock production systems and livestock species considered in existing LEAP animal guidelines: poultry, pig, small ruminant and large ruminant supply chains.

A Hands-On Way to Learning Data Analysis Part of the core of statistics, linear models are used to make predictions and explain the relationship between the response and the predictors. Understanding linear models is crucial to a broader competence in the practice of statistics. *Linear Models with R, Second Edition* explains how to use linear models
