An update of Que's bestselling Lotus Notes 4 title--which sold 12,000 copies in three months--this book is a complete reference on the latest version of Lotus Notes. It features new sections on setting up and working with Notes remotely, and working with InterNotes (for Internet access) features and Java. The CD contains all of the code and examples from the book, third-party Notes add-ons and extensions, and the entire text of the book in electronic format.

Written for programmers familiar with Notes, this guide focuses on some core design and development concepts, providing tips, procedures, examples and business applications for each concept. The first chapters deal with the process of defining a solution for the customer. The remainder cover specific material regarding LotusScript, classes in the Domino Object Model, Java, JavaScript, and OLE automation. The CD-ROM contains example files and databases, and software demo applications.
