Policy implementation at EU level plays a prominent role in EU administrative governance despite the fact that since its very beginnings the E (E)C and later also the EU have been based on what has come to be referred to as 'executive federalism'<sup>9</sup>. Generally, Member States apply and enforce policies and law adopted at European level.

The European Union said today that it wants to work with US counterparts on a common approach to tech governance -- including pushing to standardize rules for applications of technologies like AI and pushing big tech to be more responsible for what their platforms amplify. EU lawmakers are anticipating rebooted transatlantic relations under the incoming administration of president-elect Joe Biden.

This book provides a wealth of empirical material to understand key aspects of EU governance including its plurality of actors and policy making modes and its functioning during crisis management. Authored by legal scholars and political scientists, it presents new research and insights on the role of EU agencies in the context of the Euro and migration crises. Specifically, the contributions assess why the crises have led to the

creation of new EU agencies and what roles these agencies have performed since their inception; how the crisis, notably the migration crisis, has impacted on existing EU agencies; how EU agencies have shaped the policies during and after the crises; and, how the crisis has affected the accountability of EU agencies. This book is essential in understanding the intricacies of EU crisis management and the specific role of EU agencies therein, as well as EU governance more broadly. Drawing on research from the administrative sciences and using organizational, institutional and decision-making theories, this volume examines the emerging bureaucratic framework of the EU and highlights that analyzing the patterns and dynamics of the EU's administrative capacities is essential to understand how it shapes European public policy.

This thesis aims at addressing the problem of a potential dis-embedding of the EU administration from

democratic institutions. For that purpose it explores the potential of a novel approach to EU constitutionalism, namely of European conflicts-law to ensure the democratic legitimacy of EU administrative governance of GMOs. The term administrative governance is being used as referring to a system of administrative action, in which EU administrative actors implement EU law in cooperation with national administrations, as well as with scientific and private experts. In order to analyse the functioning of this system governance is

employed as analytical framework. This thesis shows that the conflicts-law approach constitutes a valuable constitutional framework. It helps to identify and better understand the legitimacy problems of EU administrative governance in the field of GMOs. The existent legal rules in this area can to a certain extent be reconceived as embodying conflicts-law mechanisms and ideas. This is most visible in their aim to procedurally organise cooperation between various actors within horizontal network structures of decision-making. However, the

implementation of GMO rules in practice has considerably undermined the functioning of conflicts-law mechanisms. The analysis reveals problematic shifts of authority, which go beyond the system of shared responsibility envisaged by the EU legislator. Instead of administrative cooperation between national and supranational actors, hierarchy in the sense of central decision-making by the Commission dominates the process. Moreover, instead of shared responsibility between public authorities and the biotech industry, the applicant has become a powerful player of GMO

regulation. This has to some extent also undermined the application of the precautionary principle in this area. This thesis concludes that attempts of EU law to constitutionalise administrative governance of GMOs in a legitimate way have not proven to be successful so far. Finally, this thesis also reveals certain limitations of the conflicts-law approach. It is suggested that conflicts-law at present should not be considered as a fully-fledged theory of European integration. Its strength lies in the ability to redirect the discussion on democratic legitimacy of EU

law, and to offer constitutional ideas for further elaboration of regulatory solutions. However, further conceptual clarifications seem necessary in order to make it operational in concrete cases of EU regulation.

Providing a comprehensive analysis of the administration of the European Union, this book examines the law and the legal framework within which it operates. Looking at the diverse approaches, techniques, and structures of public administration, it assesses the solutions they offer to political, social, and economic problems.

This book explores the activism promoted by organised networks of civil society actors in opening up possibilities for more democratic supranational

governance. It examines the positive and negative impact that such networks of civil society actors - named "interlocutory coalitions" - may have on the convergence of principles of administrative governance across the European legal system and other supranational legal systems. The book takes two main controversial aspects into account: the first relates to the convergence between administrative rules pertaining to different supranational regulatory systems. Traditionally, the spread of methods of administrative governance has been depicted primarily

against the background of the interactions between the domestic and the supranational arena, both from a top-down and bottom-up perspective. However, the exploration of interactions occurring at the supranational level between legal regimes is still not grounded on adequate empirical evidence. The second controversial aspect considered in this book consists of the role of civil society actors operating at the supranational level. In its discussion of the first aspect, the book focuses on the relations between the European administrative law

and the administrative principles of law pertaining to other supranational regulatory regimes and regulators, including the World Bank, the International Monetary Fund, the World Trade Organization, the United Nations, the Organization for Economic Cooperation and Development, the Asian Development Bank, and the Council of Europe. The examination of the second aspect involves the exploration of the still little examined, but crucial, role of civil society organised networks in shaping global administrative law. These

"interlocutory coalitions" include NGOs, think tanks, foundations, universities, and occasionally activists with no formal connections to civil society organisations. The book describes such interlocutory coalitions as drivers of harmonized principles of participatory democracy at the European and global levels. However, interlocutory coalitions show a number of tensions (e.g. the governability of coalitions, the competition among them) that may hamper the impact they have on the reconfiguration of individuals' rights, entitlements and

responsibilities in the global arena.

This book explores the work of the European Ombudsman and her or his contribution to holding the EU institutions, bodies, offices and agencies to account, through examination of complaints on maladministration, own-initiative inquiries and other proactive efforts. It considers the Ombudsman's current institutional and constitutional position and her or his 'method' of dealing with complaints, and unravels the depth of subject matters that fall under the Ombudsman's remit.

A separate chapter focuses on transparency and access to documents. The last part of the book critically reflects upon the present mandate and practice of the Ombudsman, and discusses a number of possible proposals for improvement. This work has interdisciplinary appeal and will engage scholars in law, political science and public administration, as well as EU and national policy-makers.
