Presents the life of the soldier who committed a massive national security breach by releasing thousands of classified documents to WikiLeaks, exploring the influence of his political views and gender identity issues on his actions.

This classic handbook deals with the geotechnical problems of rock slope design. It has been written for the non-specialist mining or civil engineer, with worked examples, design charts, coverage of more detailed analytical methods, and of the collection and interpretation of geological and groundwater information and tests for the mechanical properties of rock.

Winner of the Pulitzer Prize for Explanatory Reporting In this Pulitzer Prize-winning collection, Washington Post reporter Eli Saslow traveled across the country over the course of a year—from Florida and Texas to Rhode Island and Tennessee—to examine the personal and political implications and repercussions of America's growing food stamp program. Saslow shows us the extraordinary impact the arrival of food stamps has each month on a small town's struggling economy, the difficult choices our representatives face in implementing this \$78-billion program affecting millions of Americans, and the challenges American families, senior citizens, and children encounter every day in ensuring they have enough, and sometimes even anything to eat. These unsettling and eye-opening stories make for required reading, providing nuance and understanding to the complex matters of American poverty. An eBook short.

Provides profiles of solo performers, bands, producers, and record labels from the alternative rock movement, ranging from the

This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of "yield management" in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. For access to the solutions manual, please contact [marketing@www.sup.org](mailto:marketing@www.sup.org).

Each double-sided, laminated CPT 2015 Express Reference coding card is designed to facilitate proper CPT coding by supplying hundreds of the most commonly reported CPT codes per medical specialty. These easy-to-use reference cards allow health care providers and staff members to easily locate a desired code, which can then be referenced in the CPT codebook. A separate modifiers card lists all modifiers used with CPT and HCPCS codes.

Scientific advances have led to the recognition that many chronic diseases such as cancer may be preventable. In this volume, 36 contributions test cancer prevention hypotheses, attempt to interpret their results, and provide a guide to the background, rationale, and

Autobiography has seen enormous expansions and challenges over the past decades. One of these expansions has been in comics, and it is an expansion that pushes back against any postmodern notion of the death of the author/subject, while also demanding new approaches from critics. *Drawing from Life: Memory and Subjectivity in Comic Art* is a collection of essays about autobiography, semiautobiography, fictionalized autobiography, memory, and self-narration in sequential art, or comics.

Contributors come from a range of academic backgrounds including English, American studies, comparative literature, gender studies, art history, and cultural studies. The book engages with well-known figures such as Art Spiegelman, Marjane Satrapi, and Alison Bechdel; with cult-status figures such as Martin Vaughn-James; and with lesser-known works by artists such as Frédéric Boilet.

Negotiations between artist/writer/body and drawn/written/text raise questions of how comics construct identity, and are read and perceived, requiring a critical turn towards theorizing the comics' viewer. At stake in comic memoir and semi-autobiography is embodiment. Remembering a scene with the intent of rendering it in sequential art requires nonlinear thinking and engagement with physicality. Who was in the room and where? What was worn? Who spoke first? What images dominated the encounter? Did anybody smile? Man or mouse? Unhinged from the summary paragraph, the comics artist must confront the fact of the flesh, or the corporeal world, and they do so with fascinating results.

Thielicke here studies the themes of doubt and appropriation in modern Protestant thought. A leading advocate of dialectical theology, Thielicke examines the work of the great German Protestant religious philosophers from Lessing and Schliermacher through Barth and Tillich, probing these theologians' understanding of their context and how this tradition can impact our own

engagement with our times. Clear, finely nuanced, historically and philosophically mature, this is a vital reflection on the history of theology and in systematic theology.
