output device. How does this come together to make the computer work?

How Does a Computer Work? | Geeks on Site

How They Work

Together First, you provide input when you turn on the computer.

Then the system software tells the CPU to start up certain programs and to

File Type PDF

How Computers

Work
turn on some hardware devices so that they are ready for more input from you. This whole process is called booting up.

How Do Computers Work? - Fact Monster
The computer does its primary work in a part of the machine we cannot see, a control center that converts data input to

File Type PDF

How Computers

information output. This control center, called the central processing unit (CPU), is a highly complex, extensive set of electronic circuitry that executes stored program instructions.
