Click the cell where you want to display the standard deviation of your data. Type "=STDEV(B1:B10)" (without quotes). This calculates the standard deviation of the values in the range B1 to B10....

This book is about my experiences with wealth and what I have observed throughout my life, and it brought me to a strong conclusion about our ways of seeing people. There's nothing statistical about it, but revelational to those who understand. The truth is in the ones who have lived this revelation containing love, joy, peace, hope, etc...In writing this book I want to write about everything that is truthful concerning human perception of our economic situations. I want to stay away from religion, but embrace all that God deems virtuous and true. I will in some cases have references to the book in which all things are true, the Bible. This book is mainly informational, elaborating on the standards that we should cultivate, but it also contains some short stories on how I have arrived at the conclusion that a highly esteemed life is all about standard and not about monetary conditions. A short story of my life is included at the end of this book as of what propelled me to write these words. In this reading, everyone will agree that every subject and every standard can be expanded into a book. Everything is compressed for the purpose of understanding instead of elaborated narrations or preaching. I trust that you who have the Spirit of Truth to understand what you read for wisdom. John 14:26

The new edition of this annual publication (previously published solely by IFOAM and FiBL) documents recent developments in global organic agriculture. It includes contributions from representatives of the

Published with IFOAM and FiBL

Beginning JavaScript Charts shows how to convert your data into eye-catching, innovative, animated, and highly interactive browser-based charts. This book is suitable for developers of all experience levels and needs: for those who love fast and effective solutions, you can use the jqPlot library to generate charts with amazing effects and animations using only a few lines of code; if you want more power and need to create data visualization beyond traditional charts, then D3 is the JavaScript library for you; finally, if you need a high-performance, professional solution for interactive charts, then the Highcharts library is also covered. If you are an experienced developer and want to take things further, then Beginning JavaScript Charts also shows you how to develop your own graphics library starting from scratch using jQuery. At the end of the book, you will have a good knowledge of all the elements needed to manage data from every possible source, from high-end scientific instruments to Arduino boards, from PHP SQL databases queries to simple HTML tables, and from Matlab calculations to reports in Excel. You will be able to provide cutting-edge charts exploiting the growing power of modern browsers. Create all kinds of charts using the latest technologies available on browsers (HTML5, CSS3, jQuery, jqPlot, D3, Highcharts, and SVG) Full of step-by-step examples, Beginning JavaScript Charts introduces you gradually to all aspects of chart development, from the data source to the choice of which solution to apply. This book provides a number of tools that can be the starting point for any project requiring graphical representations of data, whether using commercial libraries or your own
