I bought this Total Archery book for my 12 year old son who just started his archery lessons. He has been reading it and learned fast ahead of his archery classmates. As far as my reading is concerned the author has written a complete book about archery. The mastery is left to my son. The price tag of the book is nothing compared to its contents.

This book tells about target shooting, field competition and bow hunting.

It's the ultimate introduction to the world of archery, in a book that turns into an actual bow that shoots paper arrows. All you have to do is unlock and open the upper and lower bow limbs, punch out and fold the arrows, and shoot! But the book is also a rich and lively illustrated history of archery, covering the physics of a bow and arrow; the types of bows used since 4500 BC; arrows from around the world, like the

deadly stone arrowheads used by Native Americans, or the Japanese whistling Kabura-ya that helped Samurai signal each other. Here are the great archery battles—Thermopylae in 480 BC, where the Spartan “300” faced a Persian who shot so many arrows they darkened the sky; or the Battle of Leipzig in 1813, the last battle to feature archers—horsemen from the Eurasian steppes—who helped the Russians defeat Napoleon.
