First published in 1977, this book is a companion volume to Suffer and Be Still. It looks at the widening sphere of women's activities

in the Victorian age and testifies to the dual nature of the legal and social constraints of the period: on the one hand, the ideal of the perfect lady and the restrictive laws governing marriage and property posed limits to women's independence; on the other hand, some Victorian women chose to live lives of great variety and complexity. By uncovering new data and reinterpreting old, the contributors in this volume debunk some of the myths surrounding the Victorian woman and alter stereotypes on which many of today's social customs are based.

Crime Types and Criminals is an essential introduction to the study of criminology, focusing on crime types in particular. This book provides broad coverage of all major crime types, as well as coverage of research methods and theory. This book can be used both as a stand-alone and supplementary text in courses such as introduction to criminology, crime and society, deviant behaviour, crime profiling, and many other courses within the criminology and criminal justice discipline. Unlike many of the current criminology books on the market, this is a brief book that really talks about all kinds of crime and criminals in detail in a way to capture and retain student interest.
