Supriya Rutherford Ramachandran grew up in a house of secrets. A starry-eyed dreamer, haunted by the early death of her father, she longs for a life of meaning. When she discovers a forbidden box of her grandmother's letters from India in 1938, she uncovers a dark family secret, a surprising hidden identity, and a frightening cache of uncontrollable power destined for her. As time runs out, Supriya must master the burden of her new self-awareness while the fate of the world rests precariously in her young hands. Featuring interwoven stories across present-day San Francisco and WWII India, RED SAPPHIRE pays homage to its roots in Indian mythology with a swashbuckling tale that brings together a delightfully complex counterpoint of suspenseful arcs, vivid imagery, and tender human stories. A captivating fantasy epic spanning generations, cultures and continents, THE SITA CHRONICLES is a seven book series that brings a breath of fresh air and an infusion of global storytelling to modern fantasy literature.

This fully revised fourth edition of Michael Yahuda's successful textbook brings the subject up-to-date, introducing students to the international politics of the Asia-Pacific region since 1945. As well as assessing the post-cold War uncertainties that challenged balance and power with the region, the book also examines the first two decades of the new millennium, which includes no let up on the 'war on terror', new political administrations in all the key player-states and increased cooperative security between some nations, polarised by volatile relationships between others. Analyzing politics in terms of global, regional and local trends, this new edition features: Discussion and evaluation of the Trump Presidency and its implications for the Asia-Pacific region Analysis of Japan ' s more assertive foreign policy Examination of the continued Rise of China under Xi Jinping in terms of politics, security, economic dominance and territorial conflicts in the region Ongoing debates concerning the 'war on terror' and how this shifts, forms and reforms relationships Explanation of how America ' s war ' s in the greater Middle East and the financial crash of 2008 undermined the American led international order. This new fourth edition will continue to be a core text for students of Asian politics, international relations and Cold War history.

"Rudolf Steiner's Riddles of Philosophy: Presented in an Outline of Its History is not a history of philosophy in the usual sense of the word. It does not give a history of the philosophical systems, nor does it present a number of philosophical problems historically. Its real concern touches on something deeper than this, on riddles rather than problems. Philosophical concepts, systems and problems are, to be sure, to be dealt with in this book. But it is not their history that is to be described here. Where they are discussed they become symptoms rather than the objects of the search. The search itself wants to reveal a process that is overlooked in the usual history of philosophy. It is the mysterious process in which philosophical thinking appears in human history. Philosophical thinking as it is here meant is known only in Western civilization. Oriental philosophy has its origin in a different kind of consciousness, and it is not to be considered in this book. "What is new here is the treatment of the history of philosophic thinking as a manifestation of the evolution of human consciousness. Such a treatment requires a fine sense of observation. Not merely the thoughts must be observed, but behind them the thinking in which they appear. "To follow Steiner in his subtle description of the process of the metamorphosis of this thinking in the history of philosophy we should remember he sees the human consciousness in an evolution. It has not always been what it is now, and what it is now it will not be in the future. This is a fundamental conception of anthroposophy." --From the introduction by Fritz C. A. Koelln:
