A sequel to the Amazon bestselling romance, *Preservation*, told from Ryan's point of view. Ryan Campbell is not only leaving his title of Professor behind to move on to bigger and better things at Simon and Warden Publishing, he's also become Seattle's rising literary star. Sitting on the overwhelming cusp of newfound fame, he learns soon enough that being popular has its downside. Attracted to the buzz surrounding his new career, former lovers begin to creep back into his life, and potential ones emerge with enticing advances. While he works to juggle reserved, yet stressful, wedding plans with Kate and his new public image, he has enough to manage without worrying about Carter and Dean—Kate's loveable albeit eccentric friends—and their latest shenanigans. Surrounded by a lifestyle that includes temptation at every turn, Ryan finds himself immersed in a world full of scandal and lies, where his oldest weaknesses thrive and his ghosts return to haunt him. Questioning whether his life with Kate is his best path, he must discover if he's still capable of being the man he aspired to be when she first became his, or if happily ever after is only an illusion.

Fear is sabotage's sweetest weapon. Kate has no time for meaningless romantic charades, and definitely no time for hot college professors who are full of themselves and smitten with her. Constantly battling eviction notices, tuition she can't afford, and a sick, dependent mother, the last thing she needs is to be distracted with someone else's complicated baggage. When she stumbles into Ryan Campbell's creative writing class, he is only "Mr. Campbell" to her, until Ryan finds himself captivated by her writing and she is forced to face their mutual attraction. His cocky know-it-all syndrome is enough to send her running in the other direction, and his posse of female admirers and playboy reputation are enough to squander any odds in her favor. But underneath Ryan's abrasive facade is something to behold, and she can't stay away for long. Ryan and Kate must decide who they're willing to become and fight against their former selves if they want to make things work. That's if academia, vicious vixens, old skeletons, and their own mastery at self-destruction don't pummel their efforts first.

Love, life, and happily ever after? It ' s all relative. Marine biology student Emma Pierce lives in paradise—geographically speaking, anyway. Stranded on Sanibel Island, Florida, she works at a nursing home by day and spends her nights dodging the island's infamous bad boy, Jackson Taylor, at her favorite karaoke bar. Trying to heal from the loss of her sister and a failed relationship she re-routed her life for, she's ready to graduate and finally leave Florida behind. When a run-in with Jackson and his rowdy crew goes sour at the bar one night, sparks fly and irreversible damage is done. It ' s no secret that Jackson loves to get underneath her skin, but this time he's gone too far. Now all he wants is to earn her forgiveness before she's gone for good, but their ideas of closure—and the future—are enough to keep them worlds apart.

Anyone who can interpret decision diagrams using the spectral approach can advance both the utility and understanding of classical DD techniques. For many years, a uniform and uncontested picture of utility system organization has endured across Europe. Provider and consumer roles have been largely taken for granted, and consumers have had little choice but to use the infrastructure of the only network provider available. Recent transformations have challenged this model. This book examines the ongoing environmental restructuring of consumption and provision in energy, water and waste systems. In accounting for the distinctive environmental qualities, technical features, and institutional dynamics of utility systems this book challenges contemporary conceptualizations of consumers as the autonomous drivers of environmental change. Instead, utilities and users are positioned as the 'co-managers' of utility systems, and processes of environmental innovation are seen to depend on the systemic restructuring of demand.
