Facebook, Twitter, Google...today's tech-savvy students are always plugged in. However, all too often their teachers and administrators aren't experienced in the use of these familiar digital tools. If schools are to prepare students for the future, administrators and educators must harness the power of digital technologies and social media. With contributions from authorities on the topic of educational technology, What School Leaders Need to Know About Digital Technologies and

Social Media is a compendium of the most useful tools for any education setting.

Throughout the book, experts including Will Richardson, Vicki Davis, Sheryl Nussbaum-Beach, Richard Byrne, Joyce Valenza, and many others explain how administrators and teachers can best integrate technology into schools, helping to make sense of the often-confusing world of social media and digital tools. They offer the most current information for the educational use of blogs, wikis and podcasts, online learning, open-source courseware, educational gaming, social networking, online mind mapping, mobile phones, and more, and include examples of these methods currently at work in schools. As the book clearly illustrates, when these tools are combined with thoughtful and deliberate pedagogical practice, it can create a transformative experience for students, educators, and

administrators alike. What School Leaders Need to Know About Digital Technologies and Social Media reveals the power of information technology and social networks in the classroom and throughout the education community.

Underneath the wooden deck, the small kitten did shiver But knew it was time for it to be delivered. With a tiny little voice, which matched its tiny little body, It let out a short little 'mew' to be heard by anybody. Based on a true story, A Dasher Christmas tells the heartwarming tale of how Dasher the kitten is sent to comfort a family one holiday season. Proceeds will go to New Life Home Trust and Renguti School in Kenya, Africa, serving abandoned and orphaned HIV positive babies. This book highlights the field of selfie biometrics, providing a clear overview and presenting recent advances and challenges. It also discusses numerous selfie authentication techniques on mobile devices. Biometric authentication using mobile devices is becoming a convenient and important means of verifying identity for secured access and services such as telebanking and electronic transactions. In this context, face and ocular biometrics in the visible spectrum has gained increased attention from the research community. However, device mobility and operation in uncontrolled environments mean that facial and ocular images captured with mobile devices exhibit substantial degradation as a result of adverse lighting conditions, specular reflections and motion and defocus blur. In addition, low spatial resolution and the small sensor of

front-facing mobile cameras further degrade the sample quality, reducing the recognition accuracy of face and ocular recognition technology when integrated into smartphones. Presenting the state of the art in mobile biometric research and technology, and offering an overview of the potential problems in real-time integration of biometrics in mobile devices, this book is a valuable resource for final-year undergraduate students, postgraduate students, engineers, researchers and academics in various fields of computer engineering.

The best-laid plans of ponies often go awry--and as the heist begins to fall apart, Luna's knights are put to the ultimate test. With teammates turning and new revelations coming to light, will the Nightmare Knights ever be able to defeat Eris and return Luna's powers?
