Chapter 44 Osmoregulation and Excretion Lecture Outline .
Overview: A Balancing Act. The physiological systems of animals operate within a fluid environment. The relative concentrations of water and solutes must be maintained within narrow limits, despite variations in the animal's external environment.

Where To Download Chapter 44 Osmoregulation And Excretion Biology Junction

Osmoregulation is the process of balancing the uptake and loss of water as well maintaining solute concentrations within acceptable levels: •the key factor in this balance is osmosis, the diffusion of water from high to low concentration across a semi-permeable membrane.
