Chart Of Accounts For Construction

How a chart of accounts works in construction. The chart of accounts for a construction company is used to organize financial transactions in order to build financial statements. As transactions are entered into the accounting software, they are posted to the appropriate accounts in a double-entry system. Financial statements provide a summary of these transaction amounts for a given time period.

Chart of Accounts for Construction Contractors ...

The chart of accounts is a list of every account in the general ledger of an accounting system. Unlike a trial balance that only lists accounts that are active or have balances at the end of the period, the chart lists all of the accounts in the system. It's a simple list of account numbers and names.
