...of the conscious and the unconscious, of experience and thought, and of sense perception, intuition, and imagination. From these arises the structure of religious symbolism. Sensation and physiological and psychological processes participate in the formation of the symbol structure.

Unconscious | psychology | Britannica

Consciousness has been defined as the presence of any kind of subjective experience at all. When you are conscious, there is 'something-it-is-like' to be you. This 'something-it-is-likeness' goes away when you are unconscious (for example during dreamless sleep) and is never there at all for things like tables and chairs.

CONSCIOUSNESS: CONSCIOUS VERSUS UNCONSCIOUS PROCESSES

Psychodynamic psychologists focus more on self-awareness and self-direction. Sexual and aggressive impulses are the primary focus in the psychodynamic perspective. Focus is on helping people understand how unconscious drives affect conscious choices.
