Detroit Diesel 8v71 Marine Engines

The Detroit Diesel Series 71 is a two-stroke diesel engine series, available in both inline and V configurations. The first number in the model series designation refers to the number of cylinders, and the second - 71 - the nominal displacement per cylinder in cubic inches, a rounding off of 70.93 cu in. Inline models included one, two, three, four and six cylinders, and the V-types six, eight, 12, 16 and 24 cylinders. The two largest V units used multiple cylinder heads per bank to keep the hea

8V71 Engine Detailss

During the 1970's Detroit Diesel was enjoying a large share of the overall diesel power industry, and had a commanding hold on the military, bus and marine markets. At the factory, each engine was built to a specific customer order, there were never any "shelf inventory" engines.
