### Economic Integration and the Location of Industries ...

Economic integration, process in which two or more states in a broadly defined geographic area reduce a range of trade barriers to advance or protect a set of economic goals. The level of integration involved in an economic regionalist project can vary enormously from loose association to a sophisticated, deeply integrated, transnationalized economic space. It is in its political dimension that economic integration differs from the broader idea of regionalism in general.

### Economic Integration | Britannica

The effects of economic integration on industry location in Canada and the United States seem to have been much weaker. On exception to this finding is U.S. cities on the Mexican border, whose employment growth is strongly positively correlated with export production in neighboring Mexican regions.

### North American Economic Integration and Industry Location

With the help of economic integration, the member countries will be able to have a bigger degree when it comes to the specialization in the processes and the products which are produced in the country. The specialization is completely based on the different advantages of the cost comparison and that too by a particular geographical location.

In recent decades the world economy has been characterized by deepening and widening integration. Throughout this time, there have been concerns that this process may foster the geographical concentration of industries, a view substantiated by contributions to the new economic geography.

### Industrial Location and Economic Integration | Centrifugal ...

Our emphasis is on the international location of firms in the presence of market size asymmetries and trade costs. Under the destination principle, an increase in the tax rate of a country always causes some firms to relocate to the other. This effect may be reversed under the origin principle when economic integration is deep enough.
