Embryology Gametogenesis - Basic Science Questions and ...

Concerning events during the periods of life, how different is gametogenesis in women and in men? The formation of spermatogonia in men takes place during the embryonic period. However, the formation of sperm cells is a continuous process that begins in puberty and goes on until old age, and sometimes during the whole life of the man.

Gametogenesis - Biology Questions

Gametogenesis occurs when a haploid cell (n) is formed from a diploid cell (2n) through meiosis. We call gametogenesis in the male spermatogenesis and it produces spermatozoa. In the female, we call it oogenesis. It results in the formation of ova. This article covers both oogenesis and spermatogenesis.

Gametogenesis - Spermatogenesis - Oogenesis ...

Abnormal Gametogenesis. Pathological processes during spermatogenesis and oogenesis are primarily relevant at the chromosomal level. An example of disturbed gametogenesis is non-disjunction, the incorrect segregation of chromosomes into gametes. It can occur in the course of the first and second meiotic divisions and leads to gametes with too many or too few chromosomes.
