Emotion And The Structure Of

On the contrary, emotions are structured in several ways: by their underlying neurology, by the judgments and evaluations that enter into them, by the behaviour that expresses or manifests them, and by the larger social contexts in which they occur. Thus, one might say that an emotion is an "integrated neuro-physiological-behavioral-evaluative-experiential-social phenomenon."

Emotion - The structure of emotions | Britannica

The Basic Structure of Emotions | Psychology Today

"Emotions," wrote Aristotle (384–322 bce), "are all those feelings that so change men as to affect their judgements, and that are also attended by pain or pleasure. Such are anger, pity, fear and the like, with their opposites." Emotion is indeed a heterogeneous category that encompasses a wide variety of important psychological phenomena. Some emotions are very specific, insofar as they concern a particular person, object, or situation.
