"The text authored by D G Rao saw the light of the day in 2005. A constantly evolving and contemporary subject akin to this needs prompt revision. The text is ideally suited for the undergraduate students of Chemical Engineering and Biotechnology.

Introduction to Biochemical Engineering: 2/e by D.G. Rao

The course is aimed at university-level students of all engineering backgrounds, who would like to learn the basics of modern biomedical engineering, including the development of human-robotic interfaces and systems such as bionic prosthetics. The course is covering the practical basics of almost everything that a modern biomedical engineer is required to know: electronics, control theory, microcontrollers (Arduino), and high-level programming (MATLAB).
