Menu - lapmaster-wolters.com
The pneumatic lift version of the Model 24 is based on the open face machine, but has the pressure weights attached to the rods of three pneumatic cylinders. Selfaligning bearings accommodate any slight vertical misalignment and ensure an even pressure is applied to components inside the conditioning ring.

Lapmaster Wolters Model 24 (Pneumatic Lift)
Lapmaster Model 24 is based face machine. the open on Pressure weights are attached through self aligning bearings to the rods of the pneumatic cylinders. The cylinders are mounted on a framework located over the lap plate on two upright columns. The primary function of the pneumatic arrangement is to permit loading and
