Some historical perspective will 2 | introduc tion fbe useful in answering these questions, but generally speaking it is correct to say that food science deals with the composition and structure of food, and molecular gastronomy deals with culinary transformations and the sensory phenomena associated with eating.

### Molecular Gastronomy. Exploring the Science of Flavor ...

Molecular gastronomy is a subdiscipline of food science that seeks to investigate the physical and chemical transformations of ingredients that occur in cooking. Its program includes three areas, as cooking was recognized to have three components: social, artistic, and technical. Molecular cuisine is a modern style of cooking, and takes advantage of many technical innovations from the scientific disciplines. The term "Molecular and Physical Gastronomy" was coined in 1988 by late Oxford physicist
