Wikipedia

The Perkins 4.236 is a heavy-duty, four-liter engine. Information about the engine can be drawn from the name itself. The "4" in the engine title refers to the number of cylinders, and the lack of a "V" describes a straight four layout. The "236" in the engine name refers to the total piston displacement of the engine in cubic-inches.

Engines

Engines can be used to assist you in timing a Perkins diesel 4.108, 4.236, 4.248 and 6.354 engine. Certain measures need to be taken when removing the fuel injection pump as well installing it.

Removal: First, before removing the injection pump make sure you can still see the scribe mark that Perkins put on the engine block.

This can be found on the engine block just
