The Impotence Epidemic: Men's Medicine and Sexual Desire ...

Since the 1990s China has seen a dramatic increase in the number of men seeking treatment for impotence. Everett Yuehong Zhang argues in The Impotence Epidemic that this trend represents changing public attitudes about sexuality in an increasingly globalized China. In this ethnography he shifts discussions of impotence as a purely neurovascular phenomenon to a social one.

Beijing and Chengdu, and concerned with de-mystifying and de-stigmatizing impotence, Zhang suggests that the impotence epidemic represents not just trauma and suffering, but also a contagion of individualized desire and an affirmation for living a full life.

The Impotence Epidemic: Men's Medicine and Sexual Desire ...

From the outset of the book, Zhang reveals that much of the story about impotence is about the rise of men's medicine (nanke), a new division of Chinese medicine created in the 1980s that made men feel comfortable talking about the taboo topic and encouraged treatment. Why does Zhang refer to the problem as 'impotence' rather than 'erectile dysfunction' (ED)?

The Impotence Epidemic: Men's Medicine and Sexual Desire ...

The Impotence Epidemic: Men's Medicine and Sexual Desire in Contemporary China is a beautifully written and intellectually stimulating ethnography on a controversial topic that few anthropologists have examined: male impotence and the prevalence of nanke (medicine that treats male sexual disorders) in post-Mao China. Based on over ten years of fieldwork in two major Chinese cities—Beijing in the north and Chengdu in the south—the author, Everett Yuehong Zhang, deftly shows that ...
