About The Authors

Nathan Bryan, PhD is a leading expert on nitric oxide, and assistant professor of molecular medicine at the Brown Foundation Institute of Molecular Medicine of the School of Medicine at the University of Texas Health Science Center in Houston.

Nov 12 2010

Nitric oxide (nitrogen oxide or nitrogen monoxide) is a colorless gas with the formula  $\text{NO}$ . It is one of the principal oxides of nitrogen. Nitric oxide is a free radical, i.e., it has an unpaired electron, which is sometimes denoted by a dot in its chemical formula ( $\cdot\text{N}=\text{O}$  or  $\cdot\text{NO}$ ). Nitric oxide is also a heteronuclear diatomic molecule, a historic class that drew

Nitric oxide (NO) is an unprecedented neurotransmitter. NO is a small, labile, lipid-permeable free radical molecule. It is synthesized by NO synthase (NOS) and diffuses from its site of synthesis to targets in surrounding cells. NO forms covalent and noncovalent linkages with protein and
