USB programming cable for Tait 8000 radios. This handy cable allows you to program your Tait 8000 series transceiver from your computer. Also suits TB7100 repeater/base and TM9300 series.

USB programming cable for Tait 8000 series radios TM8000 ...

I am currently building a project that utilises two Tait 8105 UHF radios. I needed to upgrade the firmware and configure the radios, but couldn't find a programming lead in the UK for sensible money. After a bit of research, I managed to build my own using a FTDI TTL-232RL USB adapter and a DB9 Breakout board.

Making a DIY programming cable for the Tait 8105 Radios

To program the Tait radios, the programming cable connects to that and plugs in to the microphone socket with an RJ12 (6 pin) modular plug. So, you can make your own programming cable by connecting a DB9

Tait 2000 series radio programming cables | AirSpayce

Tait USB programming cable to suit Tait TM8000/9000 Series Commercial Radios. With this cable and suitable Tait programming Software (Windows version) you can do things like add channels, adjust RX sensitivity, adjust TX power, adjust squelch levels, adjust advance options, and more.

TAIT 8-PIN USB Programming Cable - Radio

Programming is done using a Windows computer and a USB to serial cable. Ready-made programming cable are available on eBay, but they are pricey (considering what they are). A DIY solution is very approachable. Since the Rx/Tx logic levels are inverted on the Tait serial connector, the FTDI chip must be flashed using the FT_PROG utility.
