### Weaning Nhs Grampian

Weaning is a time for babies to learn to enjoy food. It is also a time to think about the balance of foods for your baby's health now and in the future. The foods your baby learns to eat now can have a big impact on how healthy a child and adult they become. The supporting leaflet "Weaning - What foods? When? How much?" will also help you.

Introducing your baby to solid foods, also referred to as weaning or complementary feeding, starts when your baby is around 6 months old. Your baby should be introduced to a varied diet, alongside their usual breast milk or first infant formula. It can be confusing knowing when and how to start introducing solid foods.

For non- breast fed children, a cow's milk free formula should be used. If the child is on mixed feeding, i.e. breast and bottle fed, a cow's milk free formula should be used. If symptoms only occur on introduction of top up feeds with formula then the mother does not need to exclude milk from her own diet.
