Web Technology And Design By C Xavier

Web design encompasses many different skills and disciplines in the production and maintenance of websites. The different areas of web design include web graphic design; user interface design; authoring, including standardised code and proprietary software; user experience design; and search engine optimization. Often many individuals will work in teams covering different aspects of the design process, although some designers will cover them all. The term "web design" is normally used to describ

Web design - Wikipedia

Worldwide Web Consortium (W3C) is an international community of web members to meet the Web standards. It was founded by Tim Berners-Lee, an inventor of the Web, back in the 20th century. W3C is designed to reach a full potential of the Web and to make it accessible to all users from all over the world.
